Re: OceanBound Plastic

Dear OceanBound Plastic Customer:

This letter is to certify that any resin sold under Envision Plastics' OceanBound Plastic brand has been collected within 50 kilometers of a coastline or waterway in communities that do not have formal waste collection systems. This is the definition established by the scientific community.

Envision Plastics partners with businesses in communities that meet this definition, provided they pass the Envision Plastics OceanBound Plastic scorecard, which includes criteria on safety, environmental, and social standards. Each partner is then audited by an independent third party to verify that the material collected meets the definition stated above and that the partner passes the standards on our scorecard.

Thank you for supporting our effort to keep plastics out of waterways and in your products.

Sincerely,

A handwritten signature in black ink that reads "Khosrow Hallaji".

Khosrow Hallaji
